ABOUT THE PROJECT

- Our aim was to create a music Website that is Free and Easy to use for everyone around the globe.
- We have made the website simple, yet versatile. The user can play songs based on specific preferences like Genre, Artist, or even search for a particular song.
- Basic SignUp/Login procedure and preferences, history management gives a comfortable personalised touch to the website

TOOLS AND LANGUAGES USED TO CREATE BEATFINDER

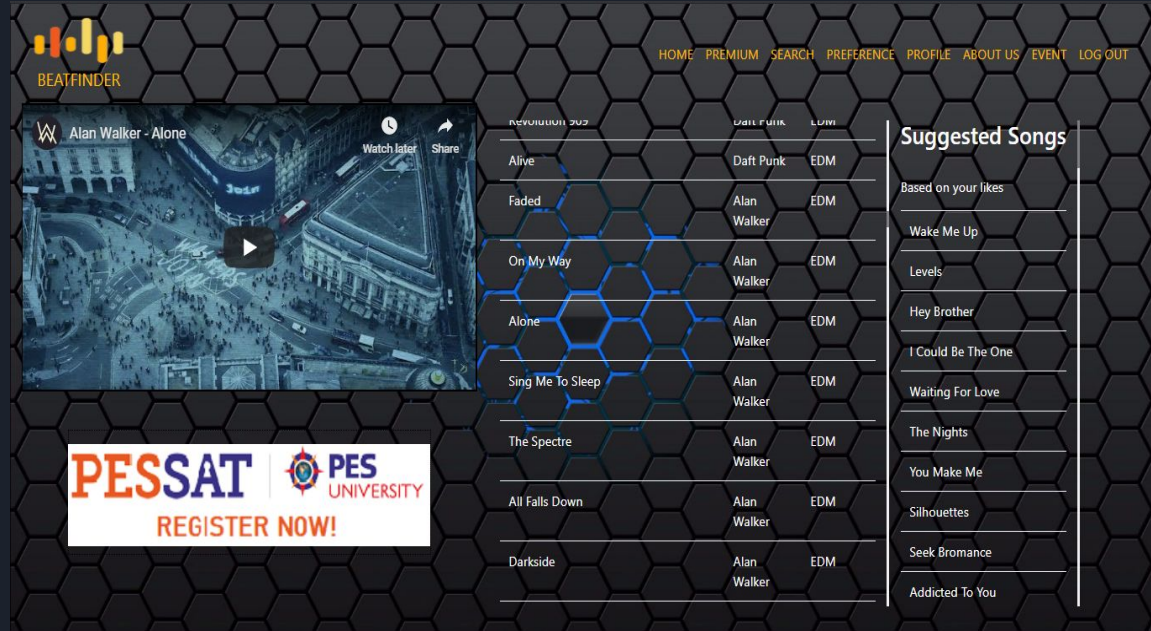

1. HTML5
2. CSS
3. BOOTSTRAP
4. JAVASCRIPT
5. JQUERY
6. PHP
7. AJAX

A SNEAK-PEEK AT THE WEBSITE HOME PAGE

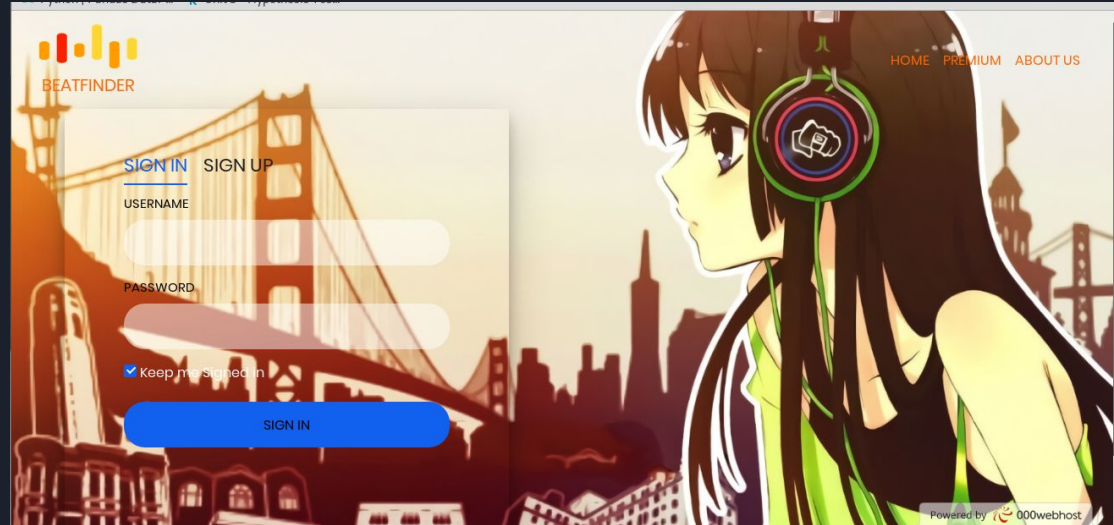

THE MAGIC BEHIND

- Since no good dataset was available online which we felt could meet the end-users need, we made our very own dataset for the backend.
- With over 700+ songs from a wide range of selections, the website offers only the best quality of songs for the user to dive in.

PERSONALISED FOR YOUR NEEDS

1. Each user is unique. To tackle this challenge we have a login portal. Each user can register to the website and enjoy personalised content.
2. Previously played and Suggested songs are some of the added advantage a user can have if he signs up in the website.
3. With a backend coded with PHP, the login/signup interface is simple and secure.

SCOPE OF IMPROVEMENT AND FUTURE ENDEAVOURS

- Scope of Improvement in algorithms for search as well as suggested songs are always present.
- The need for auto-updating the songs and musical events using various APIs is evident.
- We plan on adding a feature that will enable user to download the songs to play it offline whenever required.

The screenshot shows a comparison table for BeatFinder Premium. The table has three columns: Features, BeatFinder Free, and BeatFinder Premium. The background is a dark grey honeycomb pattern. The BeatFinder logo is in the top left, and navigation links (HOME, LOGIN, ABOUT US) are in the top right. The text 'Discover more with the BeatFinder Premium!' is written in a stylized orange font. The table lists six features: Playlists, Event Notifications, Uninterrupted Music, Unlimited Access, and Saved Preferences. The 'Free' column uses green checkmarks for Playlists and Event Notifications, and red X's for the others. The 'Premium' column uses green checkmarks for all five features. A footer note says 'Powered by 000webhost'.

Features	BeatFinder Free	BeatFinder Premium
Playlists	✓	✓
Event Notifications	✓	✓
Uninterrupted Music	✗	✓
Unlimited Access	✗	✓
Saved Preferences	✗	✓

COMING SOON! "BEATFINDER PREMIUM"

THANK YOU!
